

## PRESENTATION GUIDELINE

Presentation of papers accepted in ICIC 2018 is done by oral presentation only. Presentations are arranged through technical sessions. There are 5 technical sessions with 6 parallel tracks each. A session chair and a time keeper are assigned for each

technical session-track.

The amount of time allocated for each oral presentation in the technical session is **20 minutes including the questions and answers (Q & A) session.**

It is recommended to make the first 15 minutes for presentation by the author and 5 minutes for Q & A.

Presentation is done in English and it is highly recommended to be done using **Powerpoint** slides on an LCD projector. The technical session room will be equipped with the following items:

- A laptop computer running Windows operating system with Office application
- An LCD projector with VGA cable connector

We highly recommend that presenters bring their presentation file in a format compatible with the above mentioned applications and store it in **a flash drive**. Presentation using your own laptop is NOT allowed due to the limited time available.

It is highly recommended for each presenter to **upload their presentation** file prior to the beginning of their session to the laptop provided in the room allocated for their presentation.
